

FOR IMMEDIATE RELEASE

## **World Healing and Ascension Monthlies Returns June 18 Amid Growing Demand for Healing and Spiritual Grounding**

*Eve Wilson's Transformational Series Continues Offering Spiritual Support and Healing During Increasing Emotional and Global Uncertainty*

ANN ARBOR, Mich., May 28, 2026— As emotional fatigue, uncertainty, and rapid change continue affecting people across all walks of life, many are searching for spaces that offer not only spiritual insight, but genuine grounding, clarity, healing, and inner peace.

For internationally recognized spiritual teacher and healer Eve Wilson, that growing need continues shaping the evolution of her long-running World Healing and Ascension Monthlies series, returning June 18, 2026 through [SpiritualHealers.com](https://www.SpiritualHealers.com).

Unlike traditional spiritual classes built around rigid structures or repeated material, Wilson says the Monthlies evolve organically in response to the emotional, spiritual, and energetic needs of participants, while also addressing the broader healing needs many people feel for the world today.

"This is not simply a recurring class series," Wilson explained. "Every gathering unfolds differently because people arrive carrying different experiences, emotions, challenges, and intentions. The work evolves alongside them."

As modern life continues accelerating emotionally, mentally, and spiritually, Wilson believes many people are seeking more than information alone. Many are searching to reconnect with themselves, with peace, and with a deeper sense of balance within.

"People are carrying so much internally right now," Wilson said. "Many are seeking not only answers, but a renewed sense of calm, trust, and emotional balance."

The World Healing and Ascension Monthlies combine spiritual teaching, healing work, conscious development, and guided transformational experiences designed to support participants through personal and spiritual growth.

Wilson, founder of [SpiritualHealers.com](https://www.SpiritualHealers.com), has spent decades guiding individuals worldwide through healing work centered on consciousness, emotional restoration, energetic balance, spiritual awakening, and multidimensional transformation.

As interest in spiritual healing and conscious development continues growing globally, Wilson believes one of the greatest needs today is not simply awakening, but learning how to remain grounded while navigating an increasingly overwhelming world.

"The world is not slowing down," Wilson added. "People need spaces where they can breathe, reconnect, heal, and remember the deeper truth of who they are beneath all the noise."

Participants in the Monthlies often describe the experience as restorative, supportive, transformative, and deeply responsive to what people are collectively experiencing emotionally and spiritually.

Because each gathering responds naturally to the needs of those attending, no two Monthlies are ever identical. According to Wilson, that organic unfolding has become one of the series' greatest strengths.

"Transformation is not mechanical," she said. "Healing unfolds differently for every person, every season, and every stage of life."

Wilson believes healing becomes more powerful when people feel supported, connected, and spiritually understood within a compassionate community environment.

Enrollment for the next World Healing and Ascension Monthlies series is currently open ahead of the June 18, 2026 start date.
